

US-PAT-NO: 5530535

DOCUMENT-IDENTIFIER: US 5530535 A

TITLE: Drive control for sheet-conveying  
endless belt

----- KWIC -----

Detailed Description Text - DETX (16):

A lock control circuit 109 is to control the motion of the driven roller 102. That is, the lock control circuit 109 switches the state of the roller 102 between the locked state and the unlocked state in response to the detection signals from the front and rear sheet-end sensors 11 and 12.
